

MEDICAL RECORD CREATOR

Android 4.0 (Holo Dark) Digital Setup Guide

1 CREATE YOUR DIGITAL FILE

Click the blue button below to open a brand-new blank document instantly in your Google Drive.

→ [CLICK HERE TO OPEN DOCS.NEW](#)

2 ADD IMPORTANT DETAILS FIRST

Put your most vital emergency information right at the top so doctors can find it immediately:

- Full Legal Name & Date of Birth
- Emergency Contact Name & Phone Number
- Blood Type & Key Medical Conditions
- Known Drug Allergies (Highlight in Red)
- Current Daily Medications & Dosages

Tip: Below your main info, upload photo scans or paste written records of doctor visits, lab tests, and prescriptions.

3 SHARE DOCUMENT & COPY LINK

Once your medical document is ready, follow these simple steps to make it shareable with family or healthcare providers:

1. Click the blue **"Share"** button in the top-right corner of your document.
2. Under **"General access"**, change *Restricted* to **"Anyone with the link"**.
3. Set the permission right next to it to **"Viewer"** (so nobody accidentally edits your file).
4. Click **"Copy link"**, this is your prescription url noe press the button below to go back to the EQR generator site and paste it in.
